

## Installation Instructions

**Important: Please read these instructions before starting work.**

1. Check that there are no buried pipes or cables before drilling and holes. Take extreme care when using electrical equipment near water.
2. Do not fix accessories onto newly painted surfaces as chemical reactions could cause discoloration to the products. (Please refer to the manufactures instructions.)
3. We recommend the use of a specialized drill bit when fixing accessories to tiled areas.

### **Supplied Mounting hardware:**

Screws, wall anchors.

### **Mounting Instructions:**

1. Establish the position for the accessories, making sure there is sufficient room.
2. Using a Phillips head screw driver, remove the decorative cover by loosening the set screw found on housing.
3. Hold the backplate in the required position onto the wall and mark through with a pencil. Measure the distance between the two mounting holes, ensuring the marks are vertical by use of a carpenter's level.
4. Drill holes to a depth of 1" inch using a ¼" inch drill bit and insert the wall plugs so they are flush with the wall.
5. Fix the mounting plate to the wall by screwing the supplied screws through the holes and into the anchors. Replace the decorative cover, making sure that the set screw points directly downward before tightening.
6. Attach line anchor to other wall with included screws.

### **Care Instructions:**

We recommend regular cleaning with a mild soap and dried with a soft cloth. The use of abrasive cleaners or bleaches will damage the finish.
